SURVEY

We would like to inform that we are planning investments for a new rolling mill line with an annual capacity of ~300 K Mg, in the below scope of dimensions:

Round bars \varnothing 55 - \varnothing 220 mm
Square billets from kw. 50 ÷ kw. 200 mm
Distances from 4000 ÷ 8000 mm
Tolerances $\frac{1}{4}$ DIN
Standard straightness 2 mm/ mb.

Materials for forming and machining can be delivered in delivery conditions as below:

raw
suitable for cold cutting
softened
normalized
quenched and tempered steel.

In reference to the above, we kindly ask for any information which will help us to prepare a full estimation and assessment of your needs in range of the above assortment.

Please give information about the average annual demand in products, as below:

Name of the company
E-mail
Round bars \varnothing 55 - \varnothing 120 mm
Square bars (130-200mm)
Round billets \varnothing 50 - \varnothing 130 mm
Square billets (140-200mm)
