Machinery industry

ABRASION RESISTANT PLATES

Manganese steels microalloyed with boron and chromium- manganese and chrome- silicon- manganese for tempering and induction hardening.

Application

The charge for forgings drivetrains (and idler rollers, track links, track, blade, bucket loaders and others) of the required very high resistance to abrasion. Construction machinery industry.

Product	pipelayer SB-30M Extra, loader 543E, bulldozer TD-40E Extra, backhoe excavator 9.50M_s
Material	42CrMo4, 16MnCr5
Final product	machinery crawler cranes for construction work (laying, maintaining, unloading pipes) and transport (transfer pipes)
