Railway industry

PLATES WITH SPECIAL PROPERTIES

Abrasion resistant plates

We produce steel plates Hadfield (X120Mn12) and a plates of stainless steels, microalloyed with boron, quenched and tempered to a hardness of 350 to 500HB.

Application

Hadfield steel plates for cover shot blasting machines, the rail industry and the elements of which it is required abrasion resistance combined with cold work. Tempered plates are used for the elements which are required for strength combined with increased abrasion resistance.
